

# Australian International School Malaysia to Invest RM 20 million in New Building Developments

The Australian International School Malaysia (AISM) held a Ground Breaking Ceremony on February 22nd, 2011 for its new building developments at its six-acre premises at Southern Lake Mines Resort City in Bluwater Estate.

The building development will include the construction of a new Junior School block, expansion of the school's current information resource centre and performing arts facilities. There will be new dance and music practice rooms and even a black box theater for the performing arts.

This investment of RM 20 million will enhance facilities to extend student learning and incorporate 21st century learning designs with new, open spaces. All these new building developments are part of the school's long-term strategic plan to continuously enrich its environment and programmes for the students.

The ground breaking ceremony was witnessed by Board of Governors of Taylors Education Group, representatives from Bluwater Estate and the school community.
