

AIMS Among The World's Best In World Scholars Cup 2010

Eight AISM students from the middle and senior school, who had participated in the regional finals of the World Scholars' Cup in Singapore, boldly took on the challenge again in the 2010 Global Round held in Shanghai from June 18th-20th.

The competition tested the teams across six vast subject areas, through multiple-choice examinations, essay writing, team quizzes, debates, scavenger hunts and even a talent quest. Competing among 600 students from 30 countries, our students created history by winning important accolades in this elite global competition.

Two of our students managed to win medals in Psychology (5th placing for Junior Division and Bronze Medal for Senior Division), while our Senior School team did us proud by winning the overall 4th placing in the essay writing competition.

The students benefited from competing in an international arena with the opportunity to travel together and learn from diversity.
